The System with profile since 1965

A quality range of highly versatile modular exhibition display system.

The FOGA® Fastening System offers every conceivable Aluminum Profile, Connector, Hinge and Accessory Component needed to build Exhibits, Displays and Store Fixtures. All components are compatible with one another and are designed for use with industry standard hardware and accessories.

Design Team

A drawing or simple sketch are all we need to take the first step in bringing your project to life. Design assistance and quotations are provided at no charge. We can custom bend profiles to your exact specifications. Let us help you get started on your next project.

Over 100 Profiles

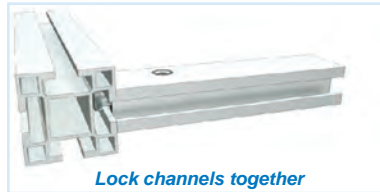

From Which To Choose

So Simple To Build

Connect channels together

Lock channels together

Tighten connections with a hex key

Low Labor, Quick Setup, No Maintenance

Patented 360° Hinge

Enables you to create many configurations that readily fold in minutes for storage & shipping

Easy To Assemble & Disassemble

... THE POSSIBILITIES ARE ENDLESS!

FOGA® IS A BUILDING SYSTEM FULLY INTEGRATED AND MODULAR. ITS WIDE RANGE OF ALUMINIUM PROFILES AND UNIQUE PATENTED COUPLING MAKES IT A COMPLETE PROGRAM FOR EXHIBITIONS, SHOPFITTING AND INTERIOR DESIGN.

BUILD OFFICE PARTITIONS; BUILD FURNITURE, SHOWCASES, DISPLAY CABINETS, MERCHANDISING UNITS, SALES KIOSKS - THE LIST IS ENDLESS; ALL IT TAKES IS CREATIVITY - THE KIND YOU HAVE WITH FOGA®.

FOGA® IS AESTHETICALLY DESIGNED, PRECISION ENGINEERED AND ANODIZED IN NATURAL ALUMINIUM TO OFFER DESIGNERS COMPLETE FLEXIBILITY IN DESIGN AND CREATIVITY.

FOGA®-System... No other way makes it so easy!

FOGA®'s wide range of aluminium extrusions and components offers limitless expression to both the designer's dilemma and the craftsman's creativity. With FOGA® even non-standard designs provide maximum scope for adaption and reuse and the system's speed and ease of assembly help to minimize construction and installation costs.

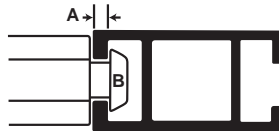

Superior Strength of the FOGA® System

The FOGA® coupling system gains its superior locking strength through two main features:

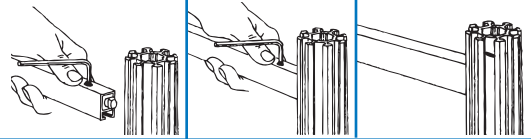

- (a) The 3 mm profile shoulders.
- (b) The double locking faces of the locking which positively engage against both shoulders ensures that profile being coupled are square to each other at all times.

The Key to FOGA® Assembly

The key to FOGA® assembly is the exclusive FOGA® coupling. All extrusions have channels to accept the coupling providing infinite adjustments and flexibility. The coupling itself can be fitted to any extrusion which has the 20 mm x 20 mm square built into its shape. The only tool needed to assemble FOGA® is an allen key. Illustrated is FOGA® Profile 91. **A 10 mm hole is punched or drilled 28.6 mm from the end of the profile to the center of the hole.** The consistency of these measurements allows for the coupling to be inserted in all appropriate FOGA® Profiles and ensures accuracy of performance at all times.

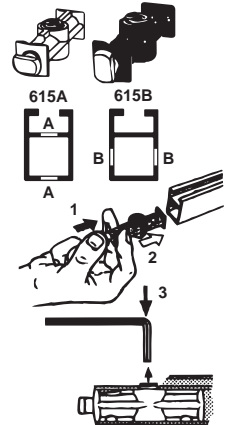

FOGA® System profile 91, already fitted with the patented FOGA® coupling, being engaged simply and speedily into profile 88. Insertion of the coupling bolt (a 90 degree turn and tightening with an alien key) produces a rigid and stable connection in all FOGA® constructions.

THE PATENT FOGA® COUPLING 615

1. The screw should be levelled with the insert. Press the bolt into the case so that the insert drops down and level with the case.
2. Push the coupling into the profile and release the press and the insert pops up into the punchhole. Tighten the coupling.

Standard finish of all profiles is natural anodized to 10 microns. Color anodized or powder coated available to special order. Profiles available in 5 meter stock lengths. All dimensions in mm. SUBJECT TO TECHNICAL ALTERATIONS

Any Angle, Any Panel, Any Display

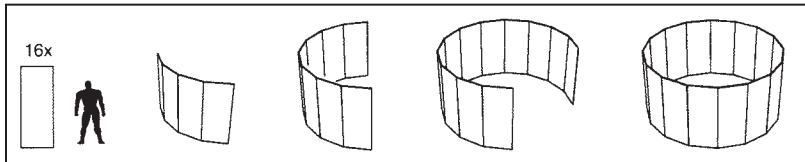

PRODUCT FEATURES:

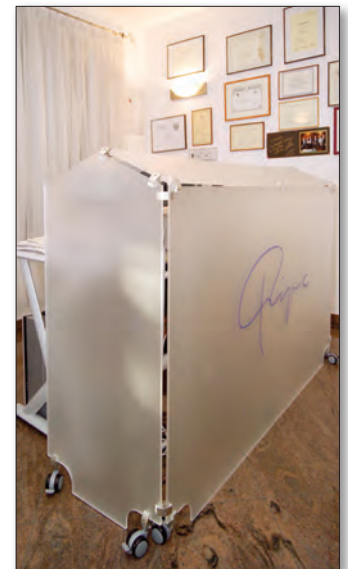

- Join panels in thicknesses ranging from 1/8" to 3/4"!
- The Klem® connector makes it easy to create angles from 90° to 270°!
- Ideal for straight or curved walls, prisms, squares cubes, pyramids, domes or any type of display!
- Made of nickel plated zinc alloy and synthetic rubber inserts. The Klem® connector provides great strength and long term durability.
- Standard gap between panels
Mini = 1/2" Super = 3/4"
- To Close gap between panels, Notch the panels.
Mini = 1/4" x 15/16"
Super = 5/16" x 1-3/8"
