3 Distinctive Mouldings

Value and Design come together to create a line of millwork designed to give all your projects a distinctive finish... a designers finish.

designer's
edge MILLWORK

Polystyrene High Density RPS Mouldings

RPS 100% Recycled High Density Mouldings, which are impervious to adverse climate and weather conditions, offer an economical decorative and design medium that are manufactured from renewable polystyrene resources. Introduced as a cost effective alternative to more costly polymer mouldings and millwork, RPS Mouldings will aesthetically satisfy all decorative requirements without having to compromise for lesser quality mouldings. The polystyrene compound from which RPS Mouldings are manufactured, not only produces a durable, impact resistant surface, making them ideally suited for use in highly trafficked environments, RPS Mouldings can be easily cut, nailed, glued, finished and installed using the same woodworking techniques and tools as wood and mdf mouldings & millwork.

The "Original" Hybrid Formula

MP-25-ADH is a high performance, one component, permanently flexible, easy to use, multi-purpose fast cure modified polyurethane sealant. MP-25-ADH cures rapidly when exposed to atmospheric moisture to form a durable bond.

- Use as adhesive or filler
- Eco-friendly, low VOC's
- Fast cure • Paintable • Non-yellowing

MP-25-ADH

designer's
edge MILLWORK

Polyurethane DEM Mouldings

DEM Mouldings and Millwork encompass a full decorative array of premium quality polyurethane cornice and panel mouldings, medallions, niches, stair brackets, pilasters and other ornamental products that are guaranteed to satisfy all decorative requirements without compromise. DEM is impervious to adverse climate and weather conditions, and, because of its dimensional stability, will not alter over time. Produced in exclusive molds that yield ornate and sharply defined details, perfect dimensions, and extremely consistent quality, DEM is lightweight, impact resistant and easy to install and finish using traditional woodworking techniques and tools.

The AXXENT Collection

Duopolymer® CX/PX/SX Mouldings

Discover new atmospheres and styles with high quality interior products. Lightweight, easy to install, easy to paint.

Duopolymer®: The Advanced Polystyrene Composite Blend from which Duopolymer® Mouldings are manufactured, not only produces an extremely durable, impact resistant surface, making Duopolymer® Mouldings ideally suited for use in highly trafficked environments. They can be easily cut, nailed, glued, finished and installed using the same woodworking techniques and tools as wood and mdf mouldings & millwork. Duopolymer® Mouldings, which are impervious to adverse climate and weather conditions, comprise an environmentally friendly, ecologically responsible water based primer coat that is produced without the use of any solvents. In addition, Duopolymer® Mouldings have sharply defined details, perfect dimensions, and extremely consistent quality, enabling them to endure years of repeated refinishing.

TRIM FAST™ THE MITER-FREE CORBEL SYSTEM

★ **PATENT
PENDING**

The Industries Only Miter-Free, Interlocking Corbel & Crown Moulding System!

Solid wood corbels are available for inside corners, outside corners & centers eliminating the need for complicated miter cuts & noticeable seems at butt joints.

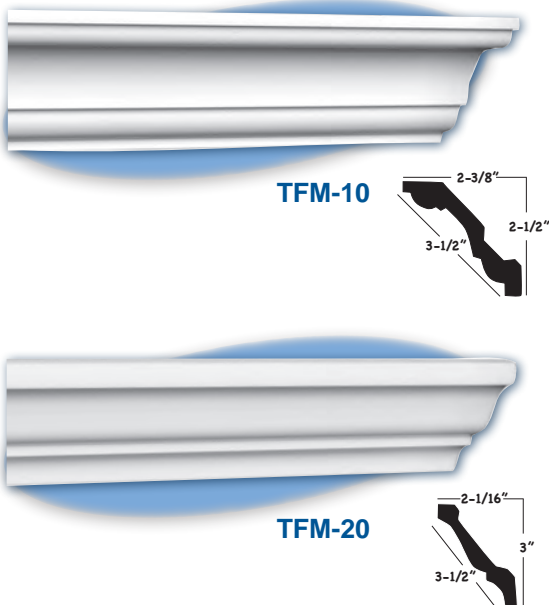

- Corbels work with corresponding mouldings only
- Mouldings should be cut approximately 3/4" longer than spacing of corbels and snapped into place

- Simply fasten corbels to wall using included hardware

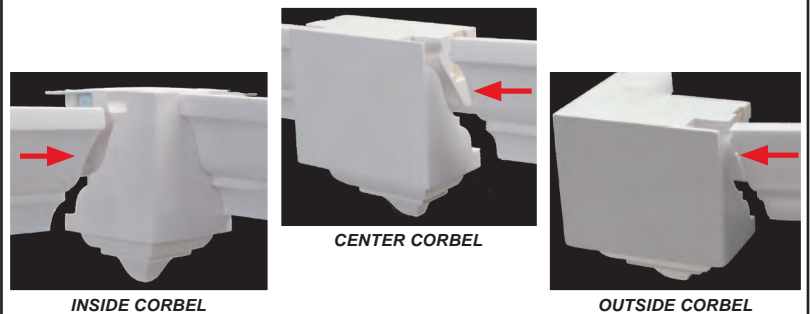

Crowns & Corbels are finished in a satin white & can be painted with a quality latex paint if desired

POLYSTYRENE CROWN MOULDINGS: AVAILABLE IN 8 FT. LENGTHS

CORBELS:

ALLOWS FOR MITER-FREE SYSTEM

MP-25-ADH

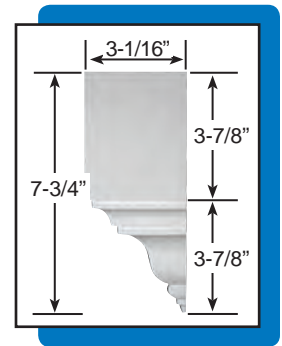

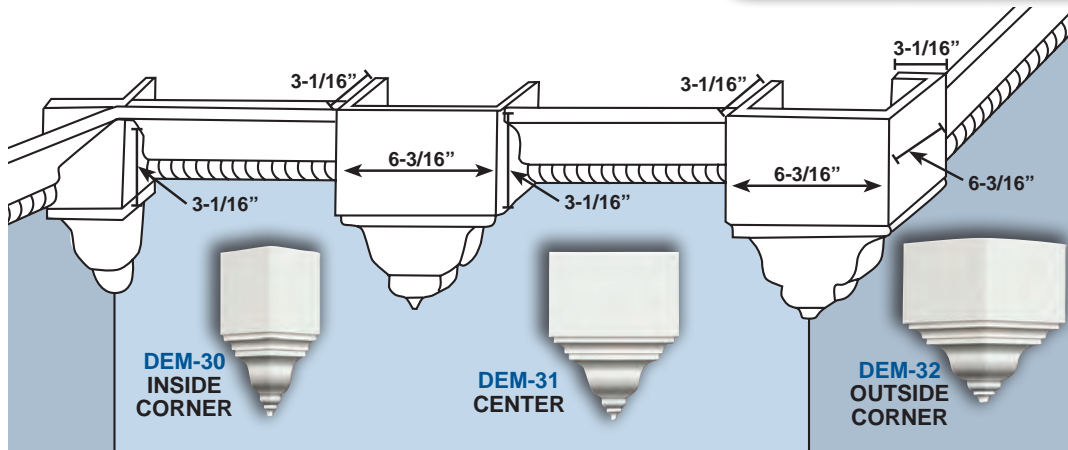

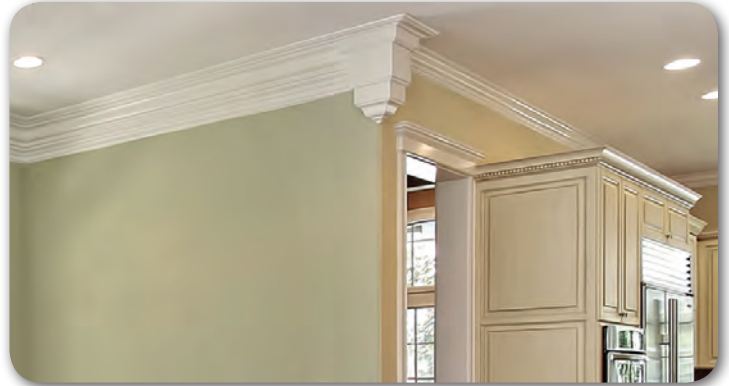

LARGE DECORATIVE DROPS

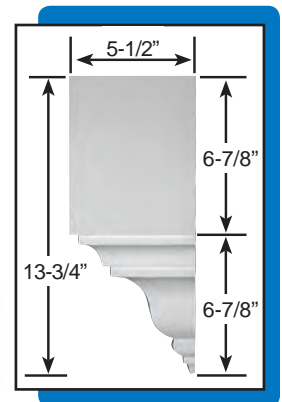

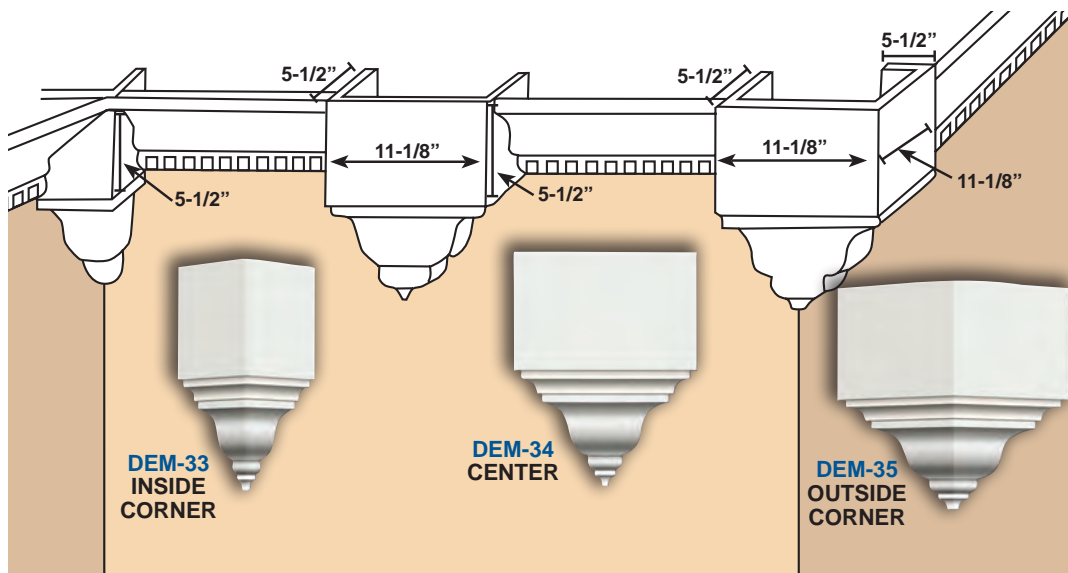

High Density Polyurethane

Our corner and center blocks allow you to install cornice mouldings quickly and easily with no need for mitering. Adding these architectural embellishments will highlight the beauty and visual appeal that crown moulding offers.

- **One piece pre-assembled, Corners & Centers.**
No need to construct your own center and outside corner, we've done the work for you, saving valuable time.
- Primed and ready for paint.
- Lightweight and easy to install, corners and centers can be cut with a saw, nail and glue just like wood.

Crown Moulding cannot exceed 3-3/16" height and 3" projection
Many great crown options can be found on pages 779-780.

Crown Moulding cannot exceed 6-3/4" height and 5-1/2" projection
Many great crown options can be found on pages 784-785.

Mitreless Cover & Butt Joint Corner

The 90° Mitreless Corner Cover & 180° Mitreless Straight Cover

These products are decorative and designed to eliminate mitering and butt joints. The covers will hide any imperfections on moulding edges and save time on installation.

Our corners allow for miscuts up to 1/4"

The 90° Butt Joint Corner & 180° Straight Butt Joint

When two ends of material are joined by butting them together using adhesive and caulk or other type of filler. These items need to have a tight fit and may require sanding, build up and caulking.

All dimensions are approximate.

ORAC DECOR

C O L L E C T I O N

The Art of Decoration

The Art of Decoration

All the decorative elements in the ORAC DECOR Collection are produced in high density polyurethane, primed white. This material is extremely durable and easy to work with. It is tough, dimensionally stable, lightweight and easy to install using common woodworking tools and the Orac Decor adhesives. Adding elements from the ORAC DECOR Collection will enhance any new construction, renovation or redecoration project making a distinctive impression. The ORAC DECOR Collection offers a full range of decorative products reproduced from popular classic to contemporary designs.

FLEXIBLE MOULDINGS

“Europe’s #1 Choice for Interior Design”

Our “Bend To Fit”, straight flex is stocked in 6’6” lengths ready for immediate shipping.

This lightweight polymer is capable of moderate radii (see chart below) to suit most applications.

FC & FP Series = Available in Straight 6’6” Lengths
SX Series = Available in Straight 8’ Lengths

NOT RECOMMENDED FOR INDIRECT LIGHTING APPLICATIONS

Inside Radius

Outside Radius

Arch Radius

Above radii are the tightest curves capable without deformation of profile and excessive stress on mounting surfaces. Our company assumes no responsibility for material when recommended radii is exceeded. It is best to paint mouldings after installation. See flexible installation page for proper installation procedures.

NOTE: Flexible mouldings may vary slightly in size (more on larger profiles) compared to rigid straight mouldings.

ADHESIVE

Focal Point Adhesive 3 is especially formulated to be used on polyurethane moulding joints and seams. It welds pieces together when properly used, virtually eliminating callbacks for joint separation. Use one tube of adhesive for every 60 linear feet of moulding. Immediately remove excess adhesive that bleeds on to the face of the moulding.

NOTE: PL Premium Polyurethane Construction Adhesive is the only recommended suitable alternative. Our warranty hinges on the use of Focal Point Adhesive 3 or PL Premium Polyurethane Construction Adhesive.

NICHE SHELL CAPS

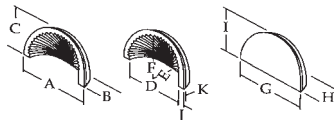

Create A Point Of Focus

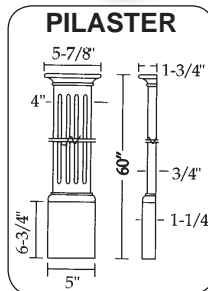

Shell niche caps are used for two reasons - when a standard niche is not wide, tall or deep enough, or the project calls for shelves within the niche. The shell niche cap has a groove molded into the underside, into which bending plywood can be inserted and attached to the framing.

Geneva Shell Niche with Plinths, available in 3 sizes. The cap is separated from the casing by plinths, and curved-plywood used for the backing. Installed with Wood Casings 91110 or 91220 (sold separately), the overall niche can be any height, and made to fit your application.

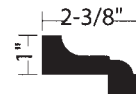

Osborne Shell Niche Cap Kit, available in 3 sizes. Each kit contains a niche cap, rim, two pilasters. Installed with Fluted Pilasters 92260 (sold with kit). The backing is created using curved plywood or tempered hardboard cut to the desired size.

FLEXIBLE "MADE TO FIT" MOULDINGS

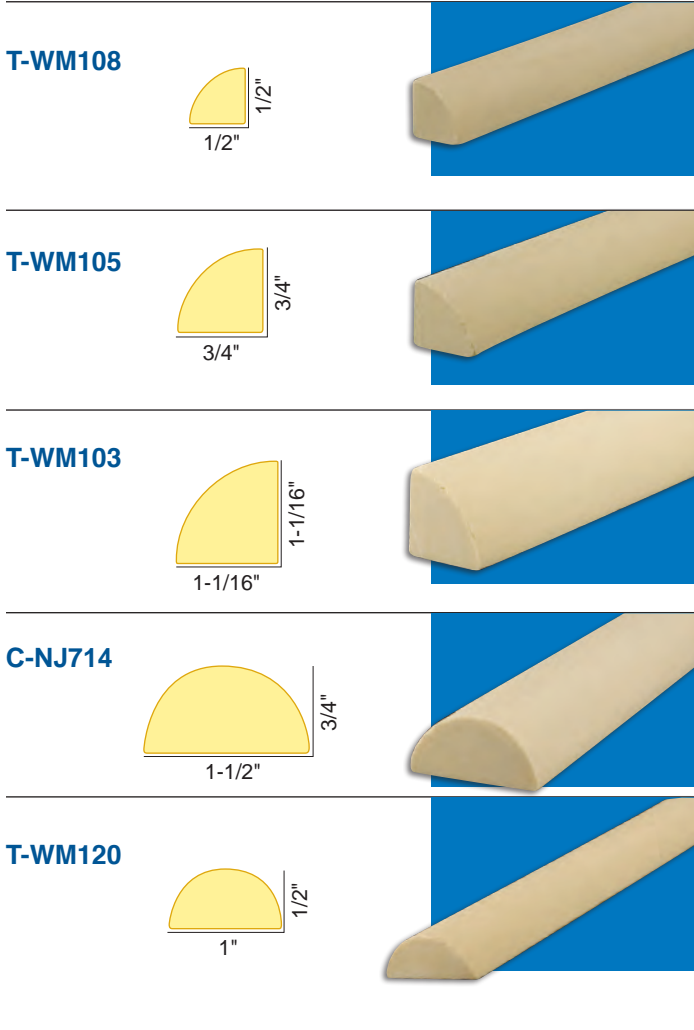

Achieve Radii Never Before Possible- Available In 6 Ft. to 12 Ft. Lengths in even 1 Ft. Increments

IMPORTANT NOTES:

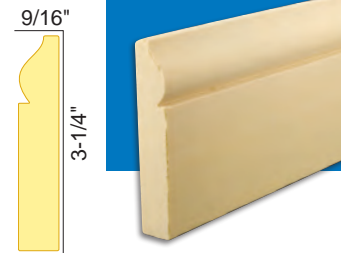

1. Material should be removed from box and stored flat when received. Allow it to come to room temperature 24 hours prior to installation.
2. For best results, the use of construction type adhesive in addition to pneumatic pin nailing is recommended. Use of tape or clamps may be helpful in securing the material in position while adhesives bond.
3. "Made-To-Fit" mouldings can be cut, shaped or sanded using normal woodworking equipment.
4. The use of water based stain such as Miniwax works well. Apply with brush or rag and wipe off. Additional coats may be applied if necessary to match wood. Be sure to allow first coat to dry completely before applying more stain. Finish with clear coat after staining.
5. All paints work well. Best results are seen when a primer coat is applied. When using Alkyd Enamels or Oil based Enamels a water base or Latex undercoat is required. Never paint before installation. The material is flexible and the paint may crack during installation.

***PLEASE NOTE: Flexible Mouldings May Shrink Up To 2% During Manufacturing (slightly more on larger profiles) in Size Compared To Rigid Mouldings.**

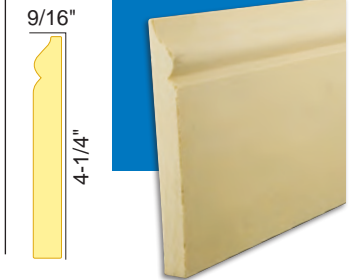

FLEXIBLE MOULDINGS ARE A NON-STOCK ITEM & HAVE A 3 WEEK LEAD TIME. EACH PIECE IS CUSTOM MADE, AND DEPENDING ON APPLICATION, RADIUS INFORMATION AND OR TEMPLATES MAY BE REQUIRED.

*** BECAUSE EACH PIECE IS MADE TO ORDER, THESE MOULDINGS ARE NON-RETURNABLE.**

FLEXIBLE "MADE TO FIT" MOULDINGS

Concave (inside) / Convex (Outside) Radius Applications:

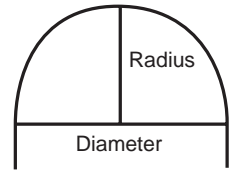

Although radius information may not be required for this application, Profiles can not achieve a tighter radius than 3 times the width of the moulding. Example: A 3" wide moulding can achieve a radius of no tighter than 9". Attempting to do so may result in cracking.

Casing Applications:

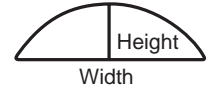

Half Round:

When ordering half circle radius casing, measure the distance across the opening at the widest point. This is the diameter of the circle (see diagram). The radius (height) dimension should be one half the length of the diameter. Specify the radius on your order.

Eyebrow:

When ordering arches or arcs (also called eyebrows or sectionals), measure the height and width of the arch (see diagram). Specify these dimensions when ordering. Templates must be furnished when ordering elliptical and oval casings.

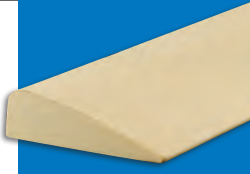

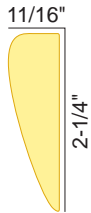

Elliptical:

Template required.

MANTEL COLUMNS

TRADITIONAL STAIN GRADE HARDWOOD MANTEL COLUMNS

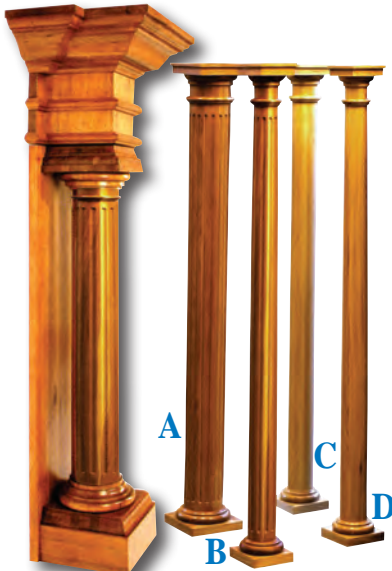

- 52" Columns w/Cap & Base.
- 3-1/2 or 5" dia. columns.

A quality stain grade column used in mantel applications, divider walls, and built in bookcases and entertainment centers. Manufactured from select hardwoods such as **Red Oak, Cherry, and Maple**. This column incorporates either a tapered shaft with true architectural entasis or a non-tapered shaft for a contemporary appearance. The classic hardwood column is available in both a plain or fluted shaft.

- A - 5" Dia. x 52" H, Fluted, Non-Tapered Column
 B - 3" Dia. x 52" H, Fluted, Non-Tapered Column
 C - 3" Dia. x 52" H, Plain, Non-Tapered Column
 D - 3" Dia. x 52" H, Plain, Tapered Column

THESE COLUMNS HAVE BEEN STAINED OR PAINTED FOR PHOTOGRAPHIC PURPOSES.

A Overall length include Tuscan Cap and Base.

Available Tapered or NON-TAPERED PLAIN or FLUTED

HAND CARVED SOLID MAPLE FIRE SURROUNDS

Our solid wood maple surrounds are hand carved from one piece of wood by master European craftsmen who have passed their art down from generation to generation. Meticulously detailed in design, these surrounds create a dramatic look worthy of the finest hearths and fireplaces. Surrounds come unfinished, ready for stain to match your surrounding woodwork. Some filling, sanding and assembly may be required.

CLASSIC WOOD FIRE SURROUNDS

ALL STYLES ARE AVAILABLE IN PAINT GRADE • OAK • CHERRY

Classic Styling... Exquisite Craftsmanship...

Why pay a mill worker to create a mantel for your home when we can provide the same quality craftsmanship at a fraction of the cost?

Old World Craftsmanship... Affordable Elegance...

We offer the best of both worlds. Our products are carefully constructed to give your home the beautiful look you want. From classic to contemporary, in unfinished oak veneer or paint grade (unfinished poplar), you'll find the style to suit your lifestyle.

General Information

- Made to fit standard 36" and 42" wide fireboxes
- Available in unpainted MDF & hardwoods (paint grade/unfinished poplar/cherry) or stain grade/unfinished oak veneer
- Constructed of veneered MDF & select hardwoods
- Designed to overlap the facing material surrounding the firebox (tile, marble, slate, etc.) This allows flexibility in sizing and facing materials (see "C" dimension)
- Installation instructions are included with every order
- Installation requires basic tools and materials including construction adhesive, nails/screws and 1" x 2" x 4' lumber strips (which can be purchased locally)
- After some filling and sanding, surrounds can be finished with most quality paints or stains
