TWO PIECE ANCHOR RIVETS

- For a 1-sided permanent assembly.
- Ideal for the building industry. Used predominantly in public areas such as schools & hospitals because the design prohibits easy removal.
- The pin "bites" into the wood as a metal stud.

- Versatile, inexpensive blind fasteners for solid or hollow materials, such as wood, concrete, plaster, metal, plastic, tile block and mortar.
- Fast installation. Simply insert the rivet into a pre-drilled hole and tap with a hammer. The drive pin expands and seats the rivet securely in place.
- **Available in White and Black. Add BK at end of part # for black.**

BLACK and CLEAR - SOLD IN 50 YARD ROLLS

Dual Lock™ fasteners are continuous plastic (Polyolefin) strips with mushroom shaped stems. The interlocking design provides re-closable fastening for a wide range of applications.

Premium Performance Adhesive

Used to meet stringent fastening requirements in automotive, aircraft and electronic equipment applications, especially when temperature range is large (-20°F to 200°F). High Bonds can be achieved to a variety of surfaces, including paint, metal, and most plastics (except polypropylene and polyethylene).

General Purpose Adhesive

Used in dynamic and static applications where temperatures do not exceed 120°. When applied under normal conditions, high adhesive bonds can be achieved to a wide variety of clean dry surfaces including difficult surfaces like polyethylene and polypropylene.

DOUBLE STICK FOAM TAPE WITH PROTECTIVE COVER

Our rubber-based Double Stick Foam Tape works well on most surfaces including: glass, metals, painted metal, paper, finished wood and plastics (including low surface energy polyethylene and polypropylene). It is not recommended for plasticized vinyl, materials contaminated with internal or surface lubricants and surfaces that are not clean and dry. Removing the tape is best accomplished by "thumbing" it off gradually. Solvents such as MEK, lacquer thinner and turpentine will degrade the adhesive, but are hazardous to work with and can damage the surface being cleaned as well.
